## How to install the Cloud Signature Update Agent for Windows

This document guides you through the process of installing the client-side, for Windows, to download your signatures to Outlook.

## To install the Cloud Signature Update Agent for Windows

*Note:* You can download the Cloud Signature Update Agent using this *link*. You may also want to close Outlook before you begin.

Follow these steps to install the signature agent for Windows:

- 1. Click **Download for Windows** to download the **Cloud Signature Agent** to your computer. Unless you change the default, the Signature Agent will download to the Downloads folder.
- 2. Open the **Downloads** folder and double-click the exe.
